2

Motivation

- Learning chinese requires a lot of time and resources
- Video media is underrepresented in the HdM, instead leaning heavily on books
- Our platform is designed with people learning mandarin in mind
- Our project groups chinese tutorial videos by tags, complexity, part of language(reading, speaking,....), etc.

3

Solution

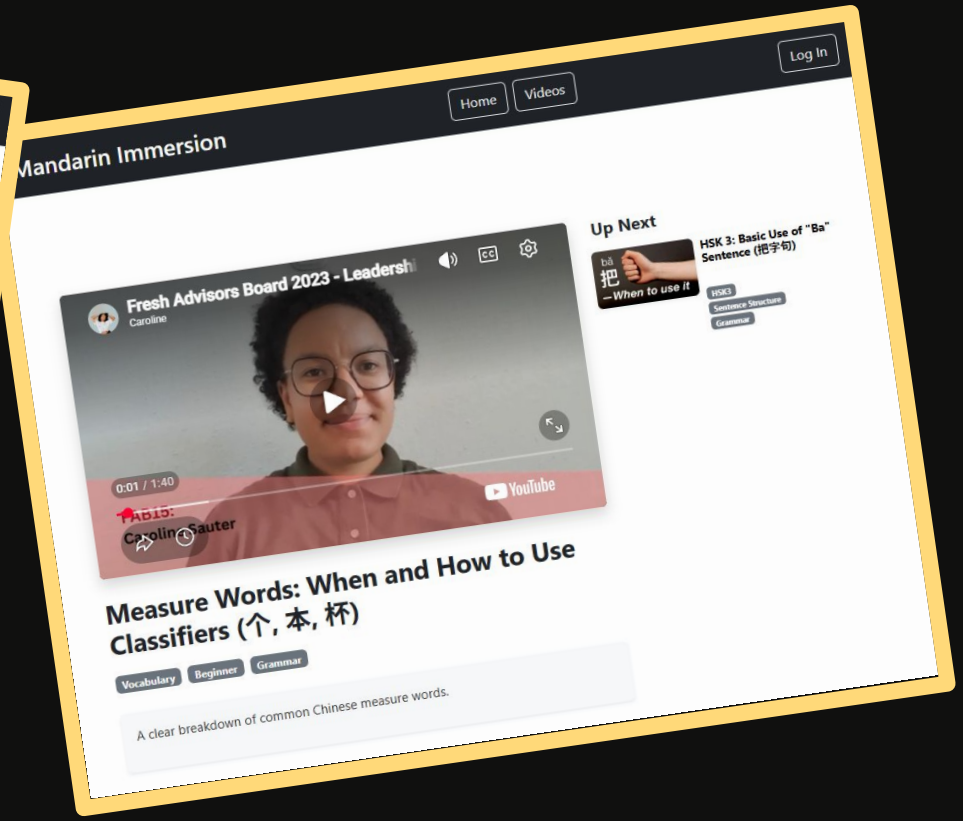

A video platform made explicitly for learning chinese!

Techstack:

- Frontend: React
- Backend: Java, SpringBoot, JPA
- Database: MariaDB
- Server: nginx, What's up Docker
- Version Control: HdM GitLab
